

头部搜索框的设置

位置：外观管理》》主题选项-》》头部》》头部搜索框

The screenshot shows the 'Header Search Bar' settings page. On the left, there's a sidebar with various theme options like 'Header Style', 'Search Layout', and 'Mobile Header'. A red arrow points from the sidebar to the 'Search Layout' section. The main area has a yellow banner at the top saying 'Settings have changed, you should save them!'. Below it, there's a 'Show Header Search Bar' toggle switch (set to 'YES') with 'ON' and 'OFF' buttons. Underneath is a 'Search Layout' section with tabs: 'Popup 1', 'Popup 2', 'Reveal', 'Form' (which is selected and highlighted in blue), and 'Overlay Popup'. There are also sections for 'Search Content Type' (with tabs for 'All', 'Post', 'Product' (selected), 'Portfolio', and 'Event'), 'Show Categories' (set to 'NO'), and 'Show Categories on Mobile' (set to 'NO'). A note below the mobile setting says '此选项仅适用于真正的移动设备'.

主要讲一下 search layout 的这里，

如果想显示搜索框在头部，如下图，要选 Form

另外的几个都是一个按钮：。只是样式会有一些细微的不同，可以自己选择保存查看。
